DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Ellis et al (US Pat. 6,233,817)

Regarding claims 9-10, Ellis et al disclose a device comprising a molded electronic component designed to comply with preset operating characteristics comprising a substrate 12 for holding passive circuit elements 3c, 3d and a material molded about the substrate 1 and circuit elements 14, 16 and 18, wherein the interaction of the material and the circuit elements 14, 16 and 18 forms a circuit causing the component to perform at the preset operating characteristics wherein the material forms a housing that is marked with indicia to indicate an operating characteristic associated with the component (column 2, lines 5-12).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 11-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ellis et al (US Pat. 6,233,817) in view of Nishijima (US Pat. 6,150,905).

Regarding claims 11-14 Ellis et al disclose all the subject matter of the claimed invention except for means for interfacing with a piece of equipment selected from the group consisting of telecommunications equipment, consumer electronics equipment, and computer equipment. However Nishijima discloses a dielectric filter. Therefore, it would be obvious to one of ordinary skill to modify means for interfacing with a piece of equipment selected of Nishijima into Ellis et al's housing in order to provide a fine adjustment of electromagnetic coupling between the equipment.

Regarding claim 14, the structure as mentioned above can performed the method claim.

Response to Amendment

5. There is no applicant's arguments with respect to claims 9-10, 11-14, the amendment has cancel allowed claims 1-8, therefore the rejection is still proper.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
